

Isna Nur Amalia

Quality Assurance practitioner with nearly 2 years of hands-on web development background. Brings a developer-level understanding of system architecture, API testing (Postman), and root-cause analysis into the Agile testing process.

Experienced in acting as the sole quality owner, independently executing end-to-end manual testing before production. Certified in Software Testing and Deep Learning, with a strong focus on defect identification and analyzing AI/LLM outputs to ensure system reliability for customer-facing platforms.

EDUCATION

Dian Nuswantoro University

Bachelor of Computer Science. GPA 3.84 out of 4.00

Semarang, Jawa Tengah

Aug. 2022 – Present

Relevant courses: Web Programming (A), Software Engineering (A), Algorithms and Programming (B), Software Requirements Engineering (A), Fundamentals of Programming (A), Database System (B)

Gadjah Mada University

Students Exchange of Computer Science. GPA 3.75 out of 4.00

Yogyakarta, DIY

Aug. – Des., 2024

Relevant courses: Deep Learning (A-), Digital Image Processing (A-), Blockchain (A-), Cybersecurity and System (A), Internet of Things (A-), High Performance Computing (AB)

QA PROJECT

Manual Testing - Saucedemo (Swag Labs)

Mar., 2026

Designed and executed full-cycle manual QA on a demo e-commerce application. Created test plan with entry/exit criteria, 19 test scenarios, and 37 test cases covering functional, negative, and edge cases across 5 core features (Login, Product Listing, Cart, Checkout). Identified and documented 9 defects with severity classification and steps to reproduce. Achieved 73% pass rate. Artifacts available at isnanuramalia.my.id

- Applied Positive, Negative, and Edge Case testing types; tested 3 user personas (standard_user, locked_user, problem_user)
 - Documented Critical bugs including cross-field input contamination and ID mapping error; created detailed defect reports with reproducibility evidence
 - Tools: Google Sheets (test documentation), Chrome DevTools (mobile view testing, responsive validation)
-

EXPERIENCES

SRLand Properties

Full Stack Developer (Internship)

Semarang, Jawa Tengah

Nov. 2025 – Feb. 2026

Developed and enhanced an internal CMS platform for HR and property operations, serving as the sole person responsible for both development and quality, manually testing each module end-to-end before handoff to operational staff.

- Built HRIS attendance feature with face recognition for employee clock-in/out; manually tested clock-in/out flows including edge cases (late clock-in, missing records, duplicate entries)
- Developed and validated overtime calculation logic based on actual clock-out records; tested boundary conditions
- Implemented and tested leave request module covering approval flows, overlapping leave validation, and permission edge cases before production handoff
- Created leasing plan feature with full CRUD and statistical dashboards; acted as sole QA by validating data accuracy across dashboard calculations and CRUD state transitions

Teknik Elektro – Universitas Dian Nuswantoro

Full Stack Developer

Semarang, Jawa Tengah

Oct. – Nov. 2025

Led end-to-end development of SICAPA, an academic measurement platform for the Electrical Engineering department based on CPL and CPMK frameworks.

- Led system planning from ideation to delivery, including ERD design and system architecture
- Designed UI/UX wireframes in Figma; developed full stack app with Laravel, React.js, and Tailwind CSS
- Built role-based access (Kaprodi, Koordinator, Dosen) and CPL/CPMK grade mapping per course component
- Delivered weighted grade calculation and rekap nilai per CPMK/CPL with CSV export
- Validated grade calculation accuracy by testing weighted scoring logic against manual calculations across multiple course and component configurations before handoff to department staff

Bengkel Koding

Web Developer Intern

Semarang, Jawa Tengah

Feb. – July 2025

Completed one-semester internship at Bengkel Koding as frontend developer in a 2-person team, with no dedicated QA, independently tested all features before each deployment. Developed Alumni Management System for Computer Science department, currently in production and used by active alumni.

- Built responsive frontend using Next.js 14 and Shadcn UI
- Implemented multi-role system (Alumni, Koordinator, Partners, and Students) with verified job postings
- Successfully launched production website serving active alumni of Computer Science users
- Performed API testing using Postman to validate endpoint responses and data integrity during frontend-backend integration

Leolit Games

Frontend Developer Intern

Semarang, Jawa Tengah

Jan. – May, 2025

Built a responsive company profile website using Next.js 14, Shadcn UI, and Tailwind CSS; sole developer and tester, delivered on tight deadline meeting all client requirements.

ORGANIZATIONAL & VOLUNTEER

Dian Nuswantoro Computer Club

Web Developer Division

Semarang, Jawa Tengah

July 2023 – Aug. 2026

Member of web developer division contributing to multiple DNCC events throughout the year. Demonstrated versatility by taking on different roles across various events while maintaining technical responsibilities for web development.

- **Event Lead** for Techverse seminar "How to Train Your Data", managed full event lifecycle with two industry speakers; served as committee member and public relations officer in other events.
- Built and maintained custom websites for all major DNCC events

CERTIFICATIONS

Board Infinity - QA & Testing Certifications

Completed 4 structured QA certifications: Introduction to Software Quality Assurance (Mar 2026), Automation and Modern Testing Tools (Mar 2026), Advanced Quality and Capstone Project (Mar 2026), and Practical Software Testing (Apr 2026).

NVIDIA

Getting Started with Deep Learning: Foundational training in artificial intelligence and deep learning concepts, directly supporting AI Trainer capabilities and LLM understanding. (Jan, 2025)

HONOR & AWARDS

Flagship Program – Top 50 Student, Dian Nuswantoro Computer Science Bachelor Batch 2022

Selected as Top 50 of 1,855 students in Dian Nuswantoro University's Flagship Program (Batch 2022), an accelerated track for high-achieving students based on academic performance and lecturer recommendations.

Final Project Excellence – Graduation Without Undergraduate Thesis

Qualified for graduation without undergraduate thesis through exceptional final project (STI-Apps Alumni Website), demonstrating outstanding technical merit.

SKILLS & LANGUAGES

QA & Testing: Manual Testing, Test Planning, Test Case Design, Bug Reporting, API Testing (Postman), Regression Testing, Functional Testing, Edge Case Testing, Defect Documentation, Chrome DevTools, Agile/Scrum (QA in Agile Environments)

Web Development: React.js, Next.js, JavaScript, TypeScript, Tailwind CSS, Bootstrap, Shadcn UI, Daisy UI, Responsive Design, SEO Optimization, Laravel, PHP, MySQL, Git/GitHub

Soft Skills: Public Speaking, Problem Solving, Team Leadership, Project Management, Technical Mentoring

Languages: Indonesian (Native), English (Intermediate)
